

Plixus V-REQ

Plixus Video Request Button Board

Description

The Plixus Video Request Button Board is an accessory for the Video-IN Box that makes it easy for any participant to request that his or her video stream become available on the Plixus® network. The network supports up to six streams in total.

The V-REQ has a micro-USB connection for easy connection with the Video-IN Box.

A simple, straightforward unit with a physical hardware button makes it easy to use the panel. An indicator LED highlights the active state of the button.

Features & Benefits

- » Plug and play setup
- » Sleek design
- » Minimal footprint
- » Tactile button

Specifications
