

TP-300 / TP-500 / TP-600

Datavideo's tablet teleprompter systems are designed for DSLRs (TP-500), handheld camcorders (TP-300) and ENG cameras (TP-600).

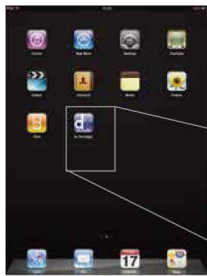

Simply attach a video camera to the frame; the special beam-splitter glass allows the presenter to read the text on the glass screen while being recorded. The teleprompters come with a light-absorbing sock cloth to shield the camcorder from extraneous light. Optional Wired or Wireless remotes for either Android or iOS devices are available for controlling the speed and the direction of text.

The free dv prompter application is available to download from the Apple™ App Store™, iPad® & Android® Play.

TABLET PROMPTER TP-300

SOFTWARE APPLICATION & REMOTE CONTROL

The dv prompter application is available to download Free from Apple™ App Store™ & Android® Play.

Control speed of your prompting script, or jump between break marks, with the optional i-remote wired/wireless controller.

Easy and quick overview of all your document scripts. Fast Script Download to TP-300's software via email and paste text copying, with instant Script Editing and Timing – use DV Prompter's in-built text editor for those last minute changes to content and timing. Change background colour, font type & size and many other features direct via the interface on the Apple™ iPad™ on the fly.
