# 1 About Kiloview

Founded in 2011, Kiloview is a professional hardware manufacturer, software developer, and solution provider in the field of IP-based video transmission and management, with products across the range of video encoding, decoding, conversion, IP-based video switching and streaming.

With the principle of Any In, Any Out, Anywhere, Kiloview provides reliable, affordable, high quality video transmission products and solutions, helping thousands of professional customers in fields of Broadcast, Sports, Education, Houses of Worship, Medical, Security, Enterprise and so on.

Kiloview supports full protocols including NDI, NDIHX, SRT as well as RTSP, RTMP, HLS, RTP, TS-UDP, and ONVIF. With flexible types of standalone and rackmount multi-channels, functions such as PTZ control, voice intercom, recording, streaming services, Kiloview offers the most versatile AV-over-IP solution in the world.

## Advantages

- 15 Years+ Technical Accumulation
- 10000+ Customers
- 300,000+ Units Sold
- 150+ Countries Exported

## Our Customers

# NDI UHD

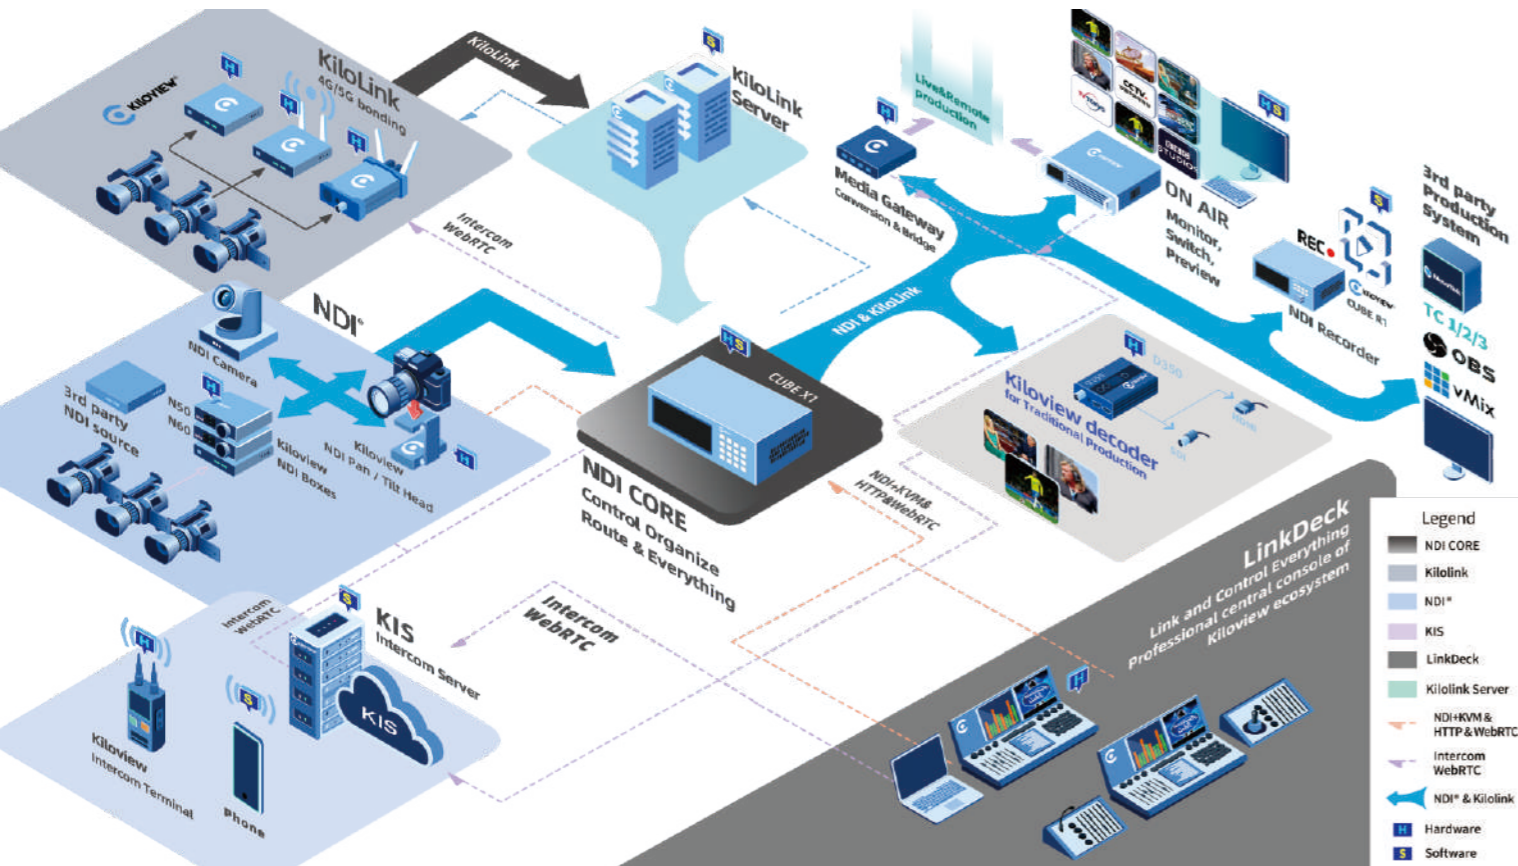

Compatible with all NDI®-enabled software and hardware

NDI® is the registered trademark of NewTek, Inc.

# WHAT KILOVIEW OFFERS

## Total IP-based Video Transmission Solution

## Video Transmission

Kiloview offers NDI, H.264 and H.265 encoders and decoders for professional IP-based video transmission with features of high-quality and low-latency.

## IP Streams Control and Management

NDI CORE is a centralized management platform to achieve unlimited NDI sources replication, multiplexing and seamless routing, etc.

## Centralized Preview & Monitoring

NDI Multiview System is a multi-screen playback system for unlimited NDI streams, supporting user-defined layout, multiple windows/multi-screen playback, output both NDI and NDI/HX.

## Centralized Recording

NDI Recorder is an independent recording system to ensure ALL your NDI sources are recorded separately in synchronization.

## Intercom

Kiloview Intercom Server (KIS) is a multi-channel communication software that is accessible to all KILOVIEW products and browsers through PC/mobile.

## Centralized Device Management

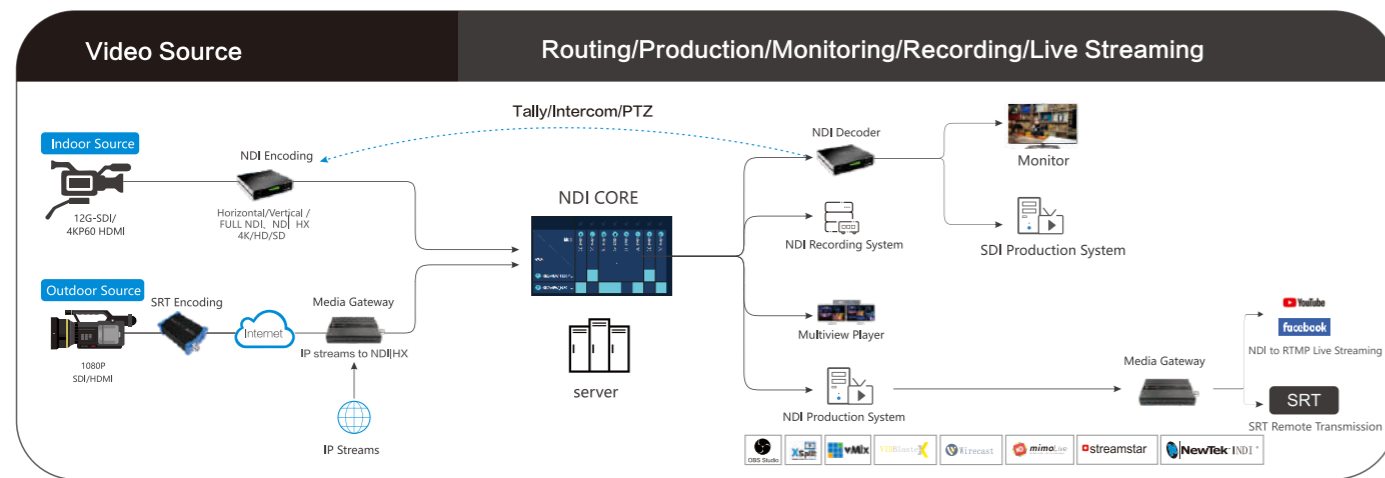

KiloLink Server is a centralized KILOVIEW product management platform for all KiloView products.

# Applications NDI+SRT+5G...

## 1 NDI Production/Transmission Solutions

NDI is the IP-based video technology developed by NewTek (now Vizrt) representing high image quality, low latency and low cost. As the official partner of NewTek NDI technology, Kiloview offers a total turnkey solution including NDI encoding/decoding, NDI Core, Multiview system, NDI Recorder system, NDI protocol conversion, easily optimizing your NDI solution.

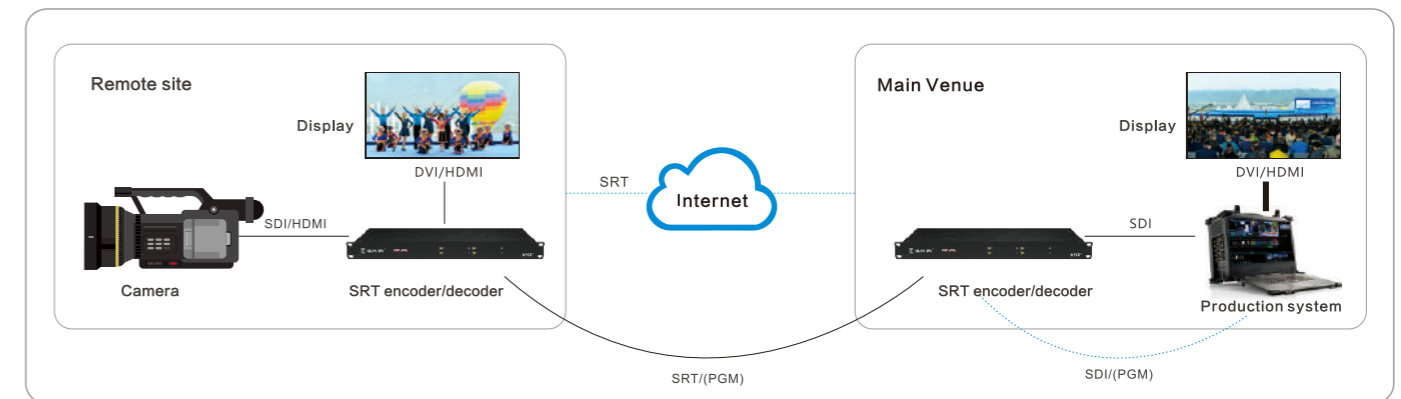

## 2 Centralized Monitoring for Live Events

Kiloview NDI|HX wireless transmission solution allows centralized monitoring for all moving cameras with low latency less than 200ms, and supports talkback among the director, the cameramen and PTZ control, etc.

## 3 SRT Solutions

SRT, which stands for Secure Reliable Transport, is a video streaming protocol, ensuring the delivery of image quality and low-latency in a secure and reliable way across the network. Kiloview full range of H.265/H.264 encoders and decoders support SRT protocol, ensuring lower latency and more reliable transmission across network for your business.

## 4 IRL Outdoor Live Streaming

For outdoor streaming, 4G bonding solutions are always required. Together with the design of up to 4CH 4G-LTE network connection + Wifi, Battery powered and recording, featuring the patented KiloLink bonding server which is simple & easy for centralized management, configuration and update, with streaming service to live stream videos in RTMP, SRT, RTSP and UDP etc. It is perfect for broadcast studios, sports, churches, universities and everyone to do live streaming or remote video transmission anytime anywhere, without the limit of network or space.

# Why Kiloview?

Flexible

Professional

Reliable

## Flexible—Full functions and total solutions

Kiloview provides flexible products including encoding, decoding, format conversion, protocols conversion, distribution and recording, graphics overlay, voice intercom, and centralized management in hardware and software mode, with the most common protocols.

## Professional—High image quality and low latency

Adopting FPGA and professional chipset, we contribute to optimizing video processing via H.264, H.265 and NDI technology for more than 10 years. SRT end-to-end latency can be less than 200ms, NDI end-to-end latency can be lowest to 1-3 frame.

## Reliable—24/7 reliable operation

Strict components selection and continuous design optimization to ensure all procedures are under professional testing.

Strict chip selection

Branded components

High end FPGA

Professional power

# Support and Customization

## Lifelong Technical Support, Customization Available.

All our products are independently developed and manufactured by Kiloview. We have a dedicated technical support team to answer all kinds of technical questions.

### After-sales Services

Service	Description
Hotline	<b>24/7 hours available by telephone or email</b> Service Hotline: 86-15576662088 E-mail: support@kiloview.com
Warranty	<b>1-Year full unit warranty and 1 additional year via registration</b> Register on Kiloview official website to enjoy a FREE extended warranty, then you will get a free warranty period of TWO years from the date of shipment. (Register here: <a href="https://www.kiloview.com/en/support/register-for-free-extended-warranty/">https://www.kiloview.com/en/support/register-for-free-extended-warranty/</a> )
Online knowledge base	<b>Please refer to website <a href="http://www.kiloview.com/en/support/">www.kiloview.com/en/support/</a> for details</b>

# 2 NDI Series

4K/HD Video Converter

Compatible with all NDI-enabled software and hardware. NDI is the registered trademark of NewTek, Inc.

**NDI+NDI/HX Series:** NDI&NDI/HX, encoding&decoding, all in one. Various choice from 12G-SDI/4K HDMI/3G-SDI/HD HDMI. (Page 22)

Model: N50,N60,N5,N6

**NDI Series:** Full NDI, encoding&decoding, all in one. Various choice from 12G-SDI/4K HDMI/3G-SDI/HD HDMI. (Page 24)

Model: N30,N40,N3,N4,U40

**NDI|HX Series:** NDI|HX wired/wireless video encoders, 4K&HD decoders with dual output (Page 28)

Model: E3,N1,N2,E1-s NDI,E2 NDI

**NDI Rack-Mounted Series:** Freely insert encoding and decoding modules in a chassis, 4/16/32 channels available. (Page 50)

Model: RE-1 v2, RE-2, REN-1 v2,REN-2 ,RE-100,REN-100,RD-260, RD-350,RN-3,RN-40, RMG-300 v2

# NDI & NDI|HX

## NDI|HX3 Bi-Directional Converter

Full NDI&NDI|HX

Encoding&decoding

Up to 4Kp60

### 4K UHD to NDI&NDI|HX bi-directional converter

N50: 12G-SDI input, loop or output

N60: 4Kp60 HDMI input, loop or output

Note: N50 and N60 support 4:2:2 10bit with NDI|HX.

## N50、N60

Size: 135×98×35mm

- NDI® NDI+NDI|HX 2.0, NDI |HX 3.0
- Encoding and Decoding end to end latency ≤ 80ms
- Dual Ethernet Ports
- Support 4K/HD HDMI input loop (N60/N6), or output 12G-SDI/3G-SDI (N50/N5)
- 3.5mm Line in/out supported

## N5、N6

2-IN-1 for NDI  
Encoding & Decoding

Full NDI&NDI|HX 2/3

Seamless Switching

KIS Intercom

Centralized Management

PoE

Support 4:2:0 8 bit with NDI|HX

### 1080p60 HD to NDI&NDI|HX bi-directional video converter

N5: 3G-SDI input, loop or output

N6: 1080P60 HDMI input, loop or output

# NDI Bi-Directional Video Converter

Encoding&Decoding, All In One

- 12G-SDI
- 4K HDMI
- HD

## Product Series

### 4K UHD to NDI bi-directional video converter

- N30: 12G-SDI input, loop or output
- N40: 4K P60 HDMI input, loop or output

### 1080p60 HD to NDI bi-directional video converter

- N3: 1080P60 SDI input, loop or output
- N4: 1080P60 HDMI input, loop or output

## More Features

- NDI High-bandwidth NDI, ultra low latency
- Tally at both sides
- USB expansion: PTZ control/digital switching keypad
- Power over Ethernet (PoE)/Gigabit network
- 5-18V wide range power supply
- NDI auto-discovery/Multiple sources smooth and seamless switching
- Rackmount solution/Freely mixed cards
- Voice intercom supported

## Functions in Common

Preset 10 NDI sources (9 decoding sources and one blank) for dynamic and smooth switching

USB Type-C expansion to keypad for outputs switching (N60 can use the scroll wheel for switching)

Auto-discovery and manual addition

# U40 4K P60 HDMI to NDI Encoder

NDI+NDIHX

HDMI/IP to NDI

PoE/PTZ/Tally

Voice Intercom

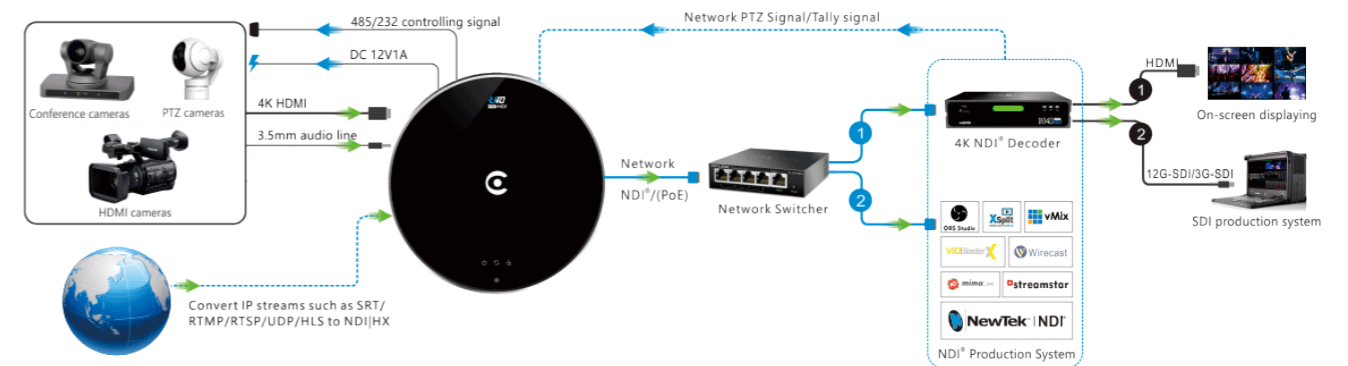

Φ : 90mm, H: 30mm

## More Features

-  Real 4K P60
-  HDMI to Full NDI  
IP to NDI|HX More options
-  PoE/PTZ/Tally
-  Voice Intercom

## Solutions

# N1/N2 Wireless NDI Encoder

Professional

Affordable wireless NDI/HX Encoder

## More Features

-  Stable **Wireless** connection
-  Most protocols NDI/HX, SRT, RTSP, RTMP and more
-  Compact size with threaded screw
-  Recording with Micro SD/NAS supported
-  Powerful encoding with multiple stream output
-  Built-in cooling fan for heat dissipation
-  Built-in battery lasting for 3 hours

Mobile shooting Remote production Live streaming

## Multi-channel HD video transmitting simultaneously

NDI/HX, SRT, RTMP, RTP, TS-UDP, HLS supported.  
Stream to 16 platforms simultaneously.  
(Main stream + Sub stream)

# NDI|HX Decoders

## D350 4K H.265/H.264 Video Decoder

Support 4K H.265/H.264 Decoding  
Support 9CH Decoding  
Output to SDI+HDMI simultaneously  
3G-SDI + 4K HDMI

## D260 H.265 Video Decoder

H.265/H.264 decoding  
4CH Multiview decoding  
Output to SDI and HDMI  
3G-SDI and HD HDMI

Please refer to P46~P49 for more details

## More Features

All Protocols: NDI, NDI|HX 2.0,  
D350 only: NDI|HX 3.0, SRT/RTMP

Multi-view display: 9CH decoding  
with split layout, dynamic switching

Output to 1x3G SDI,  
2xHDMI 2.0 simultaneously

OLED Screen display:  
real-time monitoring of unit status like  
IP address, network status

## H.265/264 Video Encoders

Broadcast Level

All Protocols

Adjustable Bitrate

7×24h Reliable Operation

Ethernet/WiFi Transmission

Adopt professional capture chipset and FPGA processing during video capturing, Kiloview optimizes H.265/H.264 algorithm during video encoding together with self-developed streaming protocol for many years, making its encoding quality at a broadcast level. With a variety of encoders, decoders, NDI converters, NDI software options available for 4K UHD/HD, Wireless, 4G, 5G, customers have benefited from transmitting videos via WAN/LAN/Internet, flexible video encoding/decoding, and affordable live streaming infrastructure with a wide range of protocols including NDI, NDIHX, SRT and RTMP.

Coupled with KIS system you can achieve multi-channel intercom communication. (see page 68)

Centralized management and monitoring of all Kiloview devices by registering to KiloLink Server. (see page 66)

### SRT

SRT (Secure Reliable Transport) is a transport protocol for enabling the delivery of high-quality, low-latency video across the network. Kiloview is a member of the SRT Alliance. Kiloview full range of H.265/H.264 encoders and decoders can support SRT protocol to help your transmission more stable with low latency over internet (Network transmission latency is able to be controlled under 200~500ms).

Compatible with H.264 encoding
- Wired network transmission
- Built-in Tally used for PVW/PGM
- Common protocols such as NDI|HX, SRT, RTP, RTSP, RTMP, TS-UDP and HLS
- Power over Ethernet(PoE)
- USB expansion storage and PTZ control
- Text and image overlay, NAS storage

# P3 5G Bonding Video Encoder

Your Go-to Device for a Perfect Outdoor Live Streaming

3G SDI+4K HDMI

H.265 Encoding

5G/4G

Modular Design

Redundant Battery

## 6CH BONDING

Up to 6 channels of IP connections bonding

## H.265 ENCODING

Save up to 50% of bandwidth

## SDI+HDMI INPUTS

3G-SDI and 4KP30 HDMI inputs

## NDI|HX/SRT/RTMP

Most commonly used streaming protocols supported

## More Features

5G

Up to 6 channels of IP connections bonding(4 CH of 5G Cellular, WiFi and Ethernet)

H.265

H.265 Encoding saves up to 50% of bandwidth

3G-SDI and 4KP30 HDMI inputs

NDI®

Streaming protocols supported including NDI|HX/SRT/RTMP/RTSP/UDP/HLS

4.3-inch display for system status monitoring and video return

Redundant battery

Safe and flexible bonding server

KIS intercom

# P series 4G Bonding Encoder

Anytime Anywhere for Live Streaming

5 network bonding

Ultra low latency

Intercom support

Centralized management

Portable and compact  
threaded screw  
camera mount

## More Features

-  Up to 5CH network bonding: 2 × internal SIMs, 2 × external SIMs by USB Dongles, 1 × WiFi
-  SRT high-quality transmission, end-to-end latency across the Internet is about 1s
-  Intercom across the Internet
-  Self-host KiloLink 4G bonding server deployed on premise or cloud-based server
-  Portable, built-in battery, for 3-5 hours streaming cold shoe installation

## More Functions

- Stable & Reliable connection at weak connectivity network condition with precise congerct control and adaptive BR mechanism.
- Ethernet/WiFi/4G-LTE transmission.
- Record/Storage: Built-in SD/TF card slot for local recording and NAS storage.
- Built-in cooling fan for non-stop streaming.
- Support more protocols: SRT, RTMP, RTMPS, RTSP, UDP, HLS, RTP and even NDI|HX(license required).
- Real-time monitoring of 4G aggregation network status, online preview for all devices.
- \* **Direct streaming from KiloLink server, no extra server required**

The 4G bonding function needs to work with KiloLink Bonding Server free.

## G Series WiFi/USB expansion 4G/Ethernet

G1-s:SDI input/loop  
G2: HDMI input/loop  
Up to 1080p 60Hz

## M2 HDMI+VGA Dual Input Ethernet

2 in1 (Note: No loop port)  
Up to 1080p 60Hz

## Functions in Common

### H.264

H.264 Encoding  
Support common protocols  
such as SRT/RTP/RTSP/RTMP/  
TS-UDP/HLS

### NDI®

Support customization for  
NDI|HX, SIP, etc.

Dual-stream output.  
Main and sub stream configured with  
different parameters and can both stream  
to 8 platforms simultaneously

User-defined text and image overlay

Pre-processing such as image  
cropping and rotation before encoding

### 64k~40M

Adjustable bitrates: 64Kbps ~ 40Mbps

### 1080P

Resolution up to 1080P60 and output  
resolution adjustable

With Micro SD/TF card slot, USB expansion  
storage and NAS network storage  
(Note: M2 without card slot,  
but can support USB expansion storage)

Audio embedded encoding and  
intercom function

# Application

A&V transmission/production/  
monitoring/live streaming/interactions/  
system integration etc.

## 3 Outdoor live streaming and remote production

## 4 Integrated with your system

# Software and Secondary Development

## Web Console (PC)

### HTTP API

Kiloview's full range of products present HTTP API including all functions. When you need to control Kiloview products by yourself, you just need to use HTTP to call API interface. Almost all programming languages including C/C++, Java, .Net, JavaScript, Python can support HTTP call programming.

### Software SDK on PC

Kiloview provides a highly packaged software SDK, which uses C/C++/.NET languages for second development based on Windows, Linux and Mac OS. SDK offers capabilities such as video stream capture, video ultra-low latency playback and recording. With the help of SDI, you will get our products integrated with your software system easily and quickly.

### Open OS for Secondary Development

After ten years' experience, our self-developed KILOVIEW Media Framework has grown into a standard video/stream media development framework. Through high integration and package, KILOVIEW Media Framework develops consistent streaming media software applications on cross-platforms (ARMLinux/x86 Linux/x64 Linux/Windows). The modular design allows users to implement flexible streaming services in a "building blocks" way.

This includes the flexible combination of streaming media transmission such as SRT/RTMP/TS/HLS /RTSP, video/audio switching, protocol conversion, and video storage. Under the premise of the license, KILOVIEW can provide Media Framework to our clients for secondary development. This is a complete set of development tools. Users can use C/C++ /Lua or other programming languages to develop their own software that can run on the encoder and quickly deploy it to the device featuring personalization.

## H.265/ H.264 Video Decoder

**Embedded**

Embedded hardware decoding

**SDI decoding**

Professional SDI decoding

**Multiview**

Multi-screen output, customization layout

**D350**  
Support 4K H.265/H.264 decoding  
9 channels IP stream decoding,  
SDI + HDMI synchronous output

**D260**  
Support HD H.264/H.265 decoding,  
4 channels IP stream decoding,  
SDI and HDMI output

Model	D350	D260
Network interface	2 × 10/100M/1000M RJ-45 Ethernet ports with PoE	2 × 10M/100M/1000M RJ-45 Ethernet ports
Decoding output	1 × SDI+2 × HDMI	1 × SDI and 2 × HDMI
Audio output	SDI/HDMI embedded, or 3.5mm Line out	SDI/HDMI embedded, or 3.5mm analog output
Input protocol	NDI, NDI HX2.0, NDI HX3.0, SRT, RTMP, RTMPS, HLS, TS over UDP, RTP and RTSP	NDI HX2.0, NDI HX3.0, SRT, RTMP, RTMPS, HLS, TS over UDP, RTP and RTSP
Video decoding format	H.265/H.264	H.265/H.264
Audio decoding format	AAC/MPEG-4/MPEG-2/G.711/Opus/LPCM	AAC/MPEG-4/MPEG-2/G.711/Opus/LPCM
decoding delay	<200ms ( adjustable )	<200ms ( adjustable )
Decoding capability	9CH 1080P60, or 4CH 4KP30, 1CH 4KP60	4 Channels 1080p60
OLED screen	0.96"OLED Screen to show IP address and status	0.96"OLED Screen to show IP address and status
Split output mode	Self-define within 9 grids	Self-define within 4 grids
Management	Web/KiloLink Server	Web/KiloLink Server
Operating temperature	-20℃-60℃	-20℃-60℃
Power	12V, 1A	12V, 1A
Size	140 × 105 × 28mm	163 × 104 × 25mm

# D350

## 4K Video Decoder

- ✓ 4K H.265/H.264 decoding
- ✓ Support 9CH decoding, split display, dynamic switching
- ✓ Support more protocols, NDI, NDI|HX, SRT video decoding
- ✓ Real-time network status monitoring

H.265

H.264/H.265

4K

Support 4KP60

Low latency decoding

9 grids division and display

Versatile protocols supporting

Multiple streams switching

Real-time status monitoring

7×24h working

## Highlights

### 4K H.265 9CH multiview video simultaneous decoding

- Support multi-channel decoding
- Support split display, dynamic switching (9CH 1080P60, or 4 for 4KP30, or 2 for 4KP60, self-definition 1/2/3/4/6/9 grids display)

### Most common protocols: NDI, NDI|HX, SRT and more

- Support NDI, NDI|HX2.0, NDI|HX3.0, SRT, RTMP, RTMPS, HLS, RTSP.
- Typical network environment decoding delay less than 200ms, delays can be set according to network conditions

### 3G-SDI, 2xHDMI 2.0 multi-interface simultaneous output

- Support 3G-SDI, 2×HDMI 2.0 multi interface synchronous output, simultaneous decoding and output of the same or different input, HDMI output up to 3840×2160@60Hz, SDI output up to 1920×1080@60Hz, the output resolution, progressive/interlaced scanning, frame rate can be adjusted
- Image and text overlay output

140\*105\*28mm

### More Features

- Real-time network status monitoring
- Dual Gigabit Ethernet interfaces, flexible to adapt to the network environment
- USB expandable storage, USB to 485/422 serial port to control PTZ camera
- Support voice intercom
- Support KiloLink Serve for centralized management

# D260

## 4-Channel HD H.265 HDMI&SDI Decoder

Hardware decoding, IP  
to SDI or HDMI

**D260** – Kiloview newest H.265 1x3G-SDI+2xHD HDMI decoder which builds on the capabilities of our DC230 with expanded new features including upgraded decoding performance, extended ports, more protocols supported and a new OLED screen.

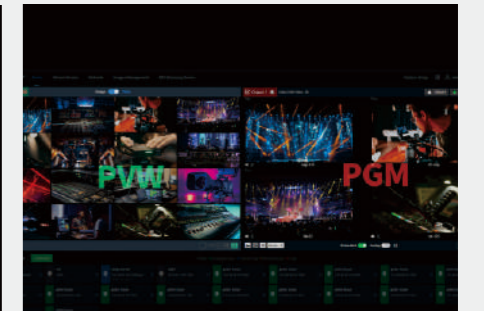

### Highlights

Support H.265/H.264 up to 1080P60, output resolution is adjustable

Support NDI|HX2.0, NDI|HX3.0, SRT, RTMP, RTMPS, HLS, RTSP and TS over UDP

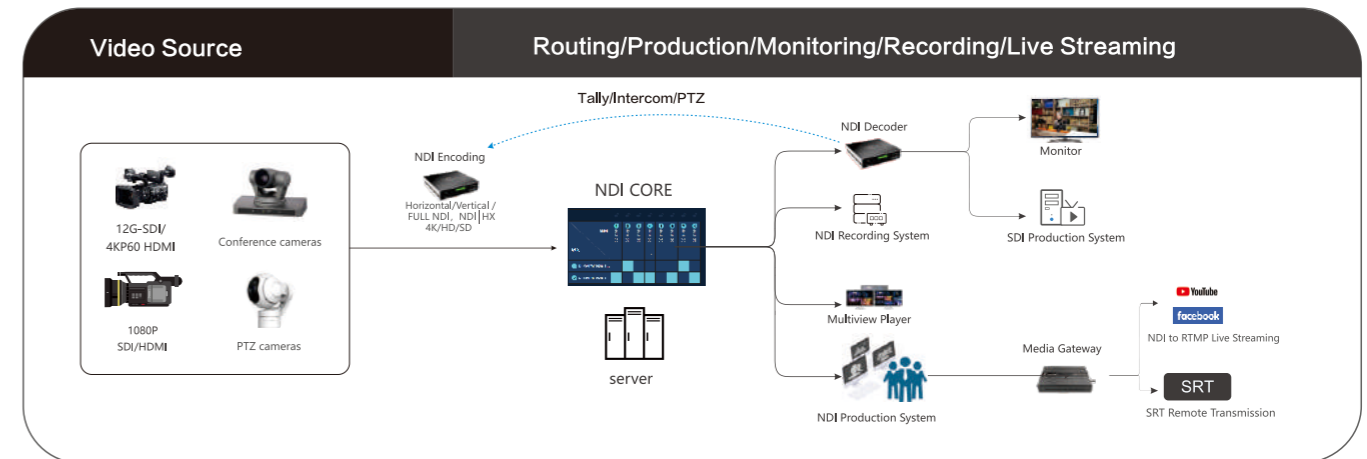

Preview 16 video streams and select 4 of them to display on the screen for output simultaneously. Monitoring PVW and PGM.

## NDI Solutions for Studio

NDI transmission/NDI Core/NDI Multiview/NDI Recorder/NDI Convert/Voice Intercom/Central Management.....

## NDI Version

There are two versions in NDI world, NDI and NDI|HX.

NDI is an I-frame higher data rate protocol that can be used to renew complicated SDI or HDMI connections, it features ultra low latency(end to end latency is around 80ms), on the other hand, it does need some bandwidth, bandwidth requirements as below:

Resolution	4KP60	4KP30	1080P60	720P60
Default Bitrate	250Mbps	200Mbps	125Mbps	90Mbps

The NDI |HX(high efficiency) is a lower bandwidth version of NDI full bandwidth. It was born and used H.264 video compression method to reduce the required network bandwidth. It only needs 10Mbps for single NDI stream in 1080P60 resolution, end to end latency is around 200ms, currently NDI|HX 2 and NDI|HX 3 are available as well.

## Free Trial

You can get a 15-day free trial of NDI Core and NDI Recorder, while NDI Multiview Free. Please visit our website to apply the free trial: <https://www.kiloview.com/en/>

# 5 NDI Solutions

NDI Core/NDI Multiview/NDI Recorder/LinkDeck

NDI is the IP-based video technology developed by NewTek (now Vizrt) representing high image quality, low latency and low cost. As the official partner of NewTek NDI technology, Kiloview offers a turnkey solution including NDI encoding/decoding, NDI Core, Multiview system, NDI Recorder system, NDI protocol conversion, easily optimizing your NDI solution. Compatible with TriCaster, vMix, OBS and other platforms, so your video production can be carried out anytime, anywhere.

# CUBE X1 NDI CORE

Cube X1 NDI CORE is a unified scheduling, switching and distribution management service product for all sources, supporting 16 NDI inputs and 32 NDI outputs, with resolution up to 4Kp60, which can realize seamless switching of all sources, without black screen and lag. In addition, it can realize non-multicast multiple distributions, multi-business grouping management, NDI signal rotation playback, etc. It is also compatible with NDI signals of any format or from any device, such as UHD/HD/NDI/NDI|HX and other NDI inputs for seamless docking. Equipped with an LCD touch screen, the CUBE X1 allows users to monitor the network status, storage space, and CPU occupation in real time.

## More Features

### Signal Amplification

Support NDI signal plication. Create as many NDI outputs as desired. (NDI signal processing capability is dependent on the performance of your own hardware server).

### Seamless Switching

Switching with no black screen, no stagnation, and no splash screen without intervention by frame synchronization device.

### NDI Loop Playback

Users can independently set the program source, dynamically adjust the playback order, playback time, etc. to achieve automatic switching.

### Group Management

Defined control panel, different groups. The input and output group can be set independently

### High Compatibility

Support any number, any format, any resolution of NDI input for seamless interfacing with other NDI software and hardware systems. Support Tally/PTZ/Metadata reverse pass-through function.

### Visual Operation

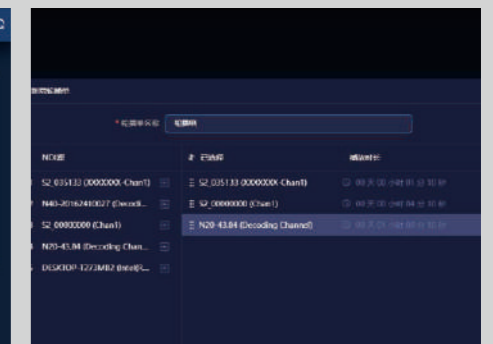

LCD touch screen + keypad design for portable and efficient management of image input and switching output.

Panel Management

NDI Crosspoint/IO Panel Switching

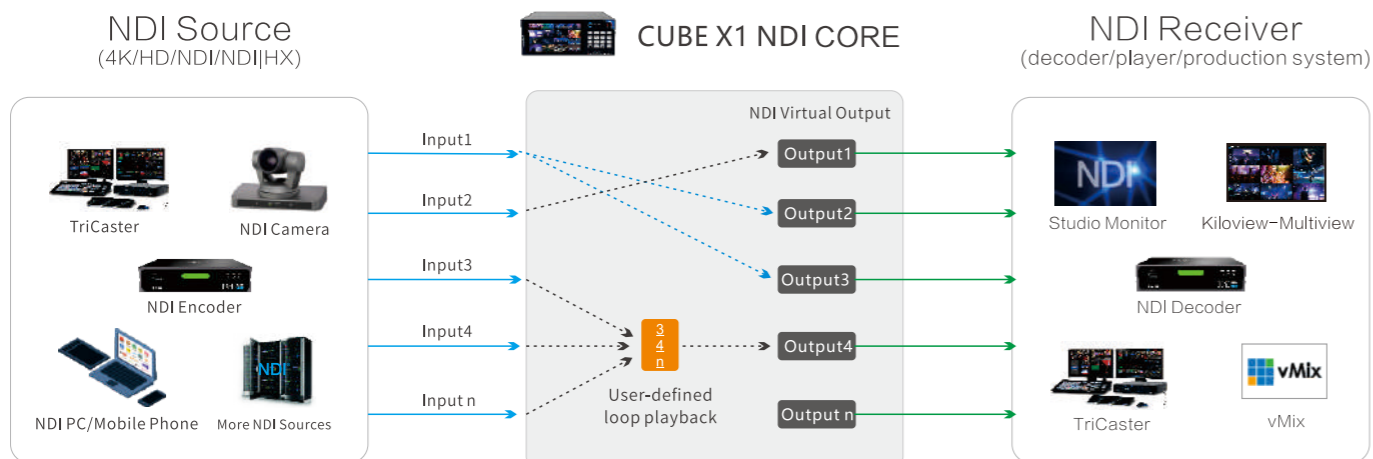

Loop Playback

## CUBE X1 NDI CORE Parameters

Model No.	CUBE X1
Inputs/Outputs	16×32 channels (customize for 64×128)
Resolutions	Up to 4Kp60
Output port	1×HDMI
USB Port	1×Type-C port for USB expansion
LCD Screen	5.5" touch-screen and 1080p resolution
Measurement	220×231.45×88mm(Half of 2U)
Network Ports	Dual 10G optical ports or electrical port and 1G RJ45 network port
CPU	8 core 64-bit processor
RAM	12GB
Operation System	Linux
Management	Web/KiloLink Server

Further software specifications, please check our website:  
<https://www.kiloview.com/en/ndi/ndi-core/>

**NDI CORE System Principle:** All NDI sources are connected to the NDI CORE server, then switched and distributed internally by the NDI CORE server, which can truly achieve seamless switching and non-multicast multiple distribution.

## NDI CORE Parameters(Software)

Types		Basic	Pro
Free Trail		15-day free trial for limited 4 inputs and 4 outputs	15-day free trial for limited 4 inputs and 4 outputs
Max NDI Input	Kiloview/NewTek	Unlimited	Unlimited
	Others	16	Unlimited
Max NDI Output		16	Unlimited
NDI Output Connections		Unlimited (Depends on bandwidth)	Unlimited (Depends on bandwidth)
Number of Control Panel		Unlimited	Unlimited
Max Input resolution		4K P60	4K P60
Max Output resolution		4K P60	4K P60
Input NDI Version		NDI/NDI HX	NDI/NDI HX
Output NDI Version		Same as input	Same as input
Switch Panel		Crosspoint	IO panel and Crosspoint
NDI Bridge Support		No	No
RTMP/RTSP/SRT Input/Output		No	No
Managed by Kiloview Multiview		No	No
Voice Intercom		No	No
Server Redundant Backup		No	No
PTZ/TALLY/METADATA Support		Yes	Yes
NDI Discovery Server Support		Yes	Yes
API		Yes	Yes
NDI Decoding		Yes	Yes
Auto Switching by Poll list		No	Yes
NDI Relay		Yes	Yes

## Multiview Pro

Multiview Pro is a multiview production system designed for centralized management, monitoring and professional switching system for multiple NDI streams. Simply select any of the NDI sources in your network, up to 20 NDI streams can be displayed in a single window for multi-screen/multi-window with any layout. NDI ONAIR System is compatible with various NDI and NDI|HX sources, both 4K and HD, and easily controlled with your smartphone, iPad or external control panel.

## Highlights

Self-defined resolutions, free layout, multi-windows and picture in picture design.

Up to 20CH sources decoding and preview simultaneously.

Support Tally, PVW/PGM switching, audio output modes optional, self-adaptive for main and sub streams.

User management for different users and production projects.

## More Features

**NDI®** Compatible with HD, 4K, NDI and NDIHX

Support volume meter, safety area, central cross, Tally display

Support NDI grouping and searching

Adopt OpenGL technology for low CPU consumption

Note: Kiloview Multiview Player free version is available.

## Multiview Pro Parameters

Model No.	Multiview Pro
NDI Compatibility	NDI, NDIHX, HD/4K
Production	Support
Multi-Window Splitting Mode	Support
Picture-in-Picture Mode	Support
Multi-Window Playing	Support
Main and Sub Stream Self-adjustment	Support
Tally	Support
NDI Discovery Server	Support
Manually add NDI Sources	Support
Management	Web/KiloLink Server
OS	128GB

## CUBE R1 Recorder System

CUBE R1 is an embedded device for multi-channel NDI video recording. The device is the hardware version of Kiloview NDI Recorder, which supports up to 9CH of NDI sources recording with 1/4/9 grids of previewing in synchronization. CUBE R1 also supports non-stop recording with its dual hot-swappable SSD slots. Both SFP and Ethernet connections allow for different network conditions.

**NDI®** All NDI sources supported

5.5" touch screen for preview and settings

Physical buttons for quick operation

HDMI output for extended display

Redundant power supply

Rack Mountable

## More Features

-  Up to 9CH NDI sources recording
-  Recording in synchronized status with 1/4/9 grids
-  Non-stop recording with dual hot-swappable SSD slots
-  Record in the fixed length / size
-  Both SFP and ethernet connections allow for different network environments

### CUBE R1 Parameters

Model No.	CUBE R1
Max CH of Recording	9
Max Input Resolution	4KP60
Output	1 × HDMI
USB Port	1 × Type-C port for USB expansion
LCD Screen	1080p resolution
Recording File Format	.mov
Chassis	Half of 2U
Network Ports	Dual 10G optical ports or 10G electrical port and 1G RJ45 network port
CPU	8 core 64-bit processor
RAM	12GB
Stream Type (preview)	Sub stream
Recording & Storage	2 × NVMe SSD
One-Click NTP Synchronization	Support
Free Layout	1/4/9
Management	Web/KiloLink Server
Power Supply/Operating Systems	Dual power supply: 220V AC / Linux

### NDI Recorder Parameters ( Software )

Parameter/Version	Trial	Full Version

# Kiloview LinkDeck

Kiloview LinkDeck Series is the product set to centrally link and control all the Kiloview hardware and software. Link Deck is based on Web RTC technology which allows doing whatever you want.

Both presenting real-time high-quality content on Panel Deck and customizing user settings & display, LinkDeck helps to manage the whole Kiloview ecosystem including Multiview Pro, NDI CORE, KIS, NDI Recorder, NDI Encoder, NDI Decoder, Multiview Player and KiloLink Server.

By developing a 3rd-party plug-in based on Python, LinkDeck even allows interaction with systems like TriCaster and vMix.

Kiloview LinkDeck consists of five unique design decks including the Panel Deck, the Take Deck, the Zoom deck, the KIS Deck, and the PTZ Deck. Each deck can combine freely to create an exclusive workbench with fully customized content. This unique design also offers Easy assembly and installation for your best user experiences.

## Panel Deck

It equips with a 10.1" touch screen and a bi-color LED keyboard for easy operation. Both soft keys and physical keys make everything under control. DC and PoE power work as the power source of all the other Decks. 7xUSB ports to connect other decks.

## Take Deck

Take Deck helps you to switch like a pro with a "T" stick and dual LED displays. 12 buttons also give a huge pleasure while creating content, Switching / FTB / Recording / Live streaming / Lock screen with one single press, is the easiest way to operate.

## PTZ Deck

PTZ Deck gives one-handed and comfortable control of all your PTZ cameras. The simple movement of the joystick and control knob is just the ideal way of taking control.

## Zoom Deck

Simply zoom in/out whenever you want. It also has 11 soft buttons for all your personal customization.

## KIS Deck

3 sets of Pro audio in/out: Mixer with cannon plug amplifier /USB microphone/ gose-neck microphone. Kis Deck can work independently via PoE port.

# 6

## Kiloview Cradle Series RU01/RU03 Rackmount Codec

The Kiloview Cradle Series include 1RU or 3RU rack-mounted frame, freely mixed with 4 channels (RU01), 16 (RU03)/32 (RU03S) codec modules. It comes with redundant power modules, centralized heat dissipation, ensuring longtime stable operation, and benefits your IP video deployments of any size and complexity.

## High Flexibility

No matter what video sources you have, SDI or HDMI for encoding or decoding with NDI or NDI|HX, the Cradle series is your ideal choice. 1RU/3RU is compatible with SDI and HDMI of both input and output; freely insert encoding and decoding modules in a chassis (Supported models refer to page 52).

## High Reliability

Cradle is equipped with redundant power as standard, effectively preventing power failure. At the same time, dual cooling fans give Cradle intelligent temperature control for automatic heat dissipation, ensuring stable and 24h continuous operating. For convenient use, Cradle offers power indicator light and operation indicator light to monitor working status.

## High Density

You may need to use multiple devices in a workflow, and sources may change over time or from day-to-day. With Cradle, you can design 4 encoding and decoding modules in a 1RU chassis, 16x or even 32x in a 3RU chassis to make them work perfectly in your environment. All inserted encoding and decoding modules support SDI/HDMI+3.5mm audio, and the decoding modules supports SDI/HDMI video output.

4 encoding decoding modules in 1RU chassis

16/32 encoding decoding modules in 3RU chassis

## Compatible Encoding Cards

Encoding Card	RE-1 v2	RE-2	REN-1	REN-2	RE-100	REN-100
Video Interface	1×BNC SDI	1×HDMI	1×BNC SDI	1×HDMI	2×BNC SDI	2×BNC SDI
Video Loop	1×BNC SDI	1×HDMI	1×BNC SDI	1×HDMI	2×BNC SDI	2×BNC SDI
NDI HX	N/A	N/A	NDI HX 1.0 and 2.0	NDI HX 1.0 and 2.0	N/A	NDI HX 1.0 and 2.0
Video Encoding	H.264/AVC, Motion-JPEG					
Audio Interface	1×3.5mm Line in				N/A	N/A
Audio Encoding	AAC/G.711					
Network	Ethernet					
Image/Text Overlay	Custom defined text and picture overlay supported, which can be set to any position on the screen					
Video Rotate/Crop	Supported					
Resolution	Up to 1080p60Hz					
Protocols Supported	SRT/RTMP/ RTMPS/HLS/TS over UDP/RTP/RTSP /Onvif					
Management	Web					
Applicable Frame	RU01/RU03/RU03S				RU03S	RU03S

## Compatible Decoding Cards

Decoding Card	RD-260	RD-350	RMG-300 v2
Video output	1×SDI and 1×HDMI	1×3G- SDI+1×HDMI	1×3G- SDI+1×HDMI
Network	1×100M/1000M RJ-45	2×100M/1000M RJ-45	2×100M/1000M RJ-45
Video Decoding	H.265/H.264	H.265/H.264	H.265/H.264
Decoding Capability	Up to 4 channels decoding(4×1080P30 or 2×1080P60 and below)	Up to 9 channels decoding (9×1080P30 or 8×1080P60)	Up to 9 channels decoding (9×1080P30 or 8×1080P60)
Protocols Supported	NDI HX2.0, NDI HX3.0, SRT, RTMP, RTMPS, HLS, TS over UDP, RTP and RTSP	NDI, NDI HX2.0, NDI HX3.0, SRT, RTMP, RTMPS, HLS, TS over UDP, RTP and RTSP	NDI, NDI HX2.0, NDI HX3.0, SRT, RTMP, RTMPS, HLS, TS over UDP, RTP and RTSP
Protocol Conversion Capability	N/A		9 CH 1080P video conversion simultaneously
Audio Decoding	AAC/G.711		
Audio Output	SDI/HDMI Embedded, or 3.5mm Analog Output		
Video Preview	Supported		
Image/Text Overlay	Supported		
Management	Web		
Applicable Frame	RU01/RU03/RU03S		

RN-40

RN-3

## Compatible NDI Cards

NDI Card	RN-40	RN-3
Video output	4K HDMI IN/OUT	3G SDI IN/OUT
Network	1×100M/1000M RJ-45	
Video Decoding/ Encoding	H.265/H.264	
Decoding /Encoding Capability	Up to 1 channels decoding or encoding	
Protocols Supported	NDI HX2.0	
Protocol Conversion Capability	N/A	
Audio Decoding/Encoding	AAC/G.711	
Audio Output	SDI/HDMI Embedded, or 3.5mm Analog Output	
Video Preview	Supported	
Image/Text Overlay	Supported	
Management	Web	
Applicable Frame	RU01/RU03/RU03S	

# 7 Mg300v2 Embedded Multi-Functional Media Gateway MG300 V2

Mult-channel video  
decoding and splitting

Video protocol conversion

## Applications

- Live streaming video from LAN RTSP/Onvif monitoring or other IP-Cameras.
- Converting general protocols such as SRT,UDP,RTSP, RTMP,HLS,NDI|HX.
- Single SRT/RTMP stream distribution.
- Dual Ethernet ports for Internal card external video transmission

Scenic spot live streaming

Campus monitoring to the public security network

Restaurants monitoring live streaming

Streaming after video splitting

## Main Functions

### Protocols conversion

- Mutual conversion of RTP/RTSP, TS over UDP, SRT, RTMP, HLS(m3u8), SIP(custom), Onvif and other software-based extensible protocols.
- Up to 9 CH streams for protocol conversion, and each stream can be converted into 4 different (or the same) target output.

### Multiple channel decoding and split screen display

- 9-CH 1080P30 video decoding, split display, and dynamic switching simultaneously.
- H.264/H.265 UHD (4K)/HD video decoding.

### Multi-Channel streams distribution

- 50CH RTSP,36CH RTMP/SRT distribution, just worked as distributed live streaming server, suitable for courseware/conference/program/digital sign and other live streaming occasions.

(Note: The actual number of concurrency depends on the specific network bandwidth, video format, etc.)

### USB options

- USB for intercom
- USB for PTZ control

## Parameters

Model No.	MG300 v2
Streaming input/output	2 × 100M/1000M RJ 45 Ethernet
Decoding output	1 × SD/HD/3G-SDI, up to 1080P 60Hz; 1 × HDMI up to 3840 × 2160@60Hz
Analog audio output	1 × 3.5mm Line out
USB	1 × USB 3.0 Type-A
Access protocols	NDI HX2.0, NDI HX3.0, SRT, RTMP, RTMPS, HLS, TS over UDP, RTP and RTSP
Output protocols	NDI HX, SRT, RTSP, RTMP, TS-UDP
Protocol conversion capability	9 CH 1080p30 video conversion simultaneously
Streaming distribution capability	50 channels of RTSP, 36 channels of RTMP/SRT (Not more than 800Mbps)
Live streaming capability	9 CH × 4CH 1080p
Channels of decoding	4K 30Hz H.264/H.265: up to 4 channels simultaneously 1080P 50Hz/60Hz H.264/H.265: up to 9 CH simultaneously
Video decoding	H.264/H.265
SDI output formats	1080P60/59.94/50, 1080P30/29.97/25/24/23.98 1080i60/59.94/50 720P60/59.94/50 570i/50 480i/60
HDMI output formats	4K 3840x2160@60/30, 1080p60/50, 1080p24/25/30, 1080i60/50, 720p60/50 and compatible with VESA standard format
Video bitrate	128Kbps ~ 40Mbps
Audio decoding	AAC/G.711 (aLaw/uLaw)
Audio bitrate	AAC: 8Kbps ~ 320Kbps G.711: 64Kbps
Decoding latency	≤200ms
Split display style	1/2/4/6/9 splitting; Re-encoding and streaming of 1-channel multi-screen split video and the image supports up to 1080P60 H.264 encoding
Management interface	Web-based user interface for configuration and upgrading
Power/power consumption	12V/1A ≤6W
Dimension/Weight	162.85 × 104.00 × 25.00mm
Operating temperature	-20 °C ~ 60°C

# 8 KiloLink Server & Kiloview Intercom System

Centralized Kiloview product management platform & Kiloview Intercom Server

## KiloLink Server Centralized Management Platform

KiloLink Server is a centralized product management platform allowing users to manage all Kiloview devices. You can monitor devices status, video preview, audio video information, IP address, network condition and streaming types in real time. Under maintenance mode, users can do batch processing to all the connected devices including upgrade, reset and restart to manage each Kiloview encoders/decoders.

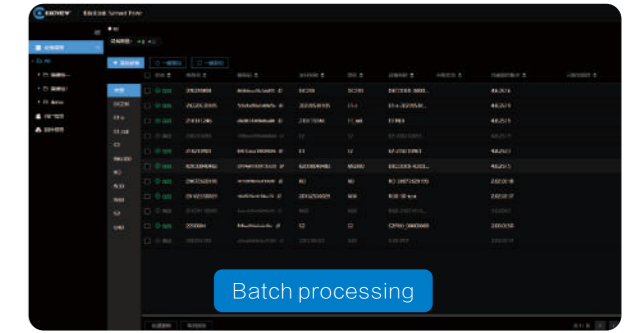

# KiloLink Server Centralized Management Platform

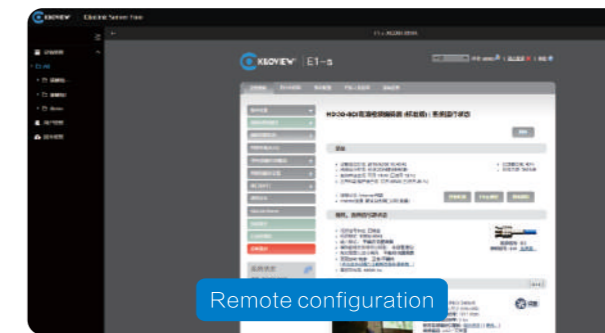

KiloLink Server is a centralized Kiloview product management platform based on KiloLink, the patented technology of Kiloview. It optimizes the process of IP-based video transmission to manage and aggregate all Kiloview devices. KiloLink Server allows users do batch processing to all the connected devices including upgrade, reset and restart. With detailed management modules, you can manage group of devices or a specific device if you need. Also, you can control the system permission of each user group and a specific user with a super admin account. All these features make the control of each Kiloview encoders/decoders easy and accurate.

Monitor devices statuses, video preview, audio video information, IP address, network condition, protocols in real time.

Under maintenance mode, user can do batch processing to all the connected devices including upgrade, reset and restart to manage each Kiloview encoders/decoders.

Log in KiloLink Server simply with browsers for relevant configurations, no need to access each device's Webpage.

## Parameters

Parameters/Product Type	KiloLink Server	KiloLink Server Pro
Max Number of Management	32	Unlimited
Streaming Media Service	NO	Support
User/Group Management	YES	YES
System Permission Management	YES	YES
Firmware Upgrade	YES	YES
Organizational Management	YES	YES
OS	Linux	Linux
Service Life	Permanent free	Pay for Authorization

# Kiloview Intercom Server Pro (software version)

Kiloview Intercom Server Pro (KIS Pro) is a multi-channel communication software that is accessible via all Kiloview products and browsers through PC/mobile. KIS Pro adopts the mature Web RTC method to realize the function of multi-channel communication, supports up to 32 terminals to join, and supports multi-channel communication in LAN or across the Internet.

## Kiloview Intercom Server Parameters

Model No.	Kiloview Intercom Server Pro	
Version	Trial Version	Full Version
Max CH of Terminals	No Limit	No Limit
Max Sampling Rate	8KHz	8KHz
Audio Tracks Mode	Mono	Mono
Encoding Format	G.711	G.711
Intercom Function	Support	Support
One-Click On/Off of the Mic	Support	Support
Multi-Language Switching	Support	Support
User Management	Support	Support
Device Management	Support	Support
API	Support	Support
Management	Web/KiloLink Server	Web/KiloLink Server
OS	Linux OS	Linux OS
Service Life	30 Days	Depending on Authorization
Deployment Method	Support on-premise & cloud deployment. You can also choose Kiloview intercom hardware.	

### Multi-channel Communication

Up to 32 terminals to join in the communications

### On-premise and Cloud-based Deployment

On-premise and cloud-based deployment, multi-channel communication in LAN or across the Internet.

### Centralized Management

More flexible management and centralized control all the terminals.

### Multiple Terminals Access

Join the communication with mobile/PC/Ipad, simply through browsers, anywhere any time.

### Patented Technology

Patented with mixer technology and no need for a high-performance server.

### SRTP Encryption

SRTP encryption AV encoding and decoding format to keep communication contents confidential.

# KIS Deck

## Just Listen!

KIS Deck is a member of the LinkDeck series. It can combine with other decks or work independently with its own PoE port.

KIS Deck offers 3 sets of pro audio in/out: Mixer with cannon plug amplifier, USB microphone and a goose-neck microphone. This deck is all you want about the audio intercom.

With both Kiloview Intercom Server and KIS Deck to meet the communication needs of the program production site, it can also be conveniently connected to the 4G call terminal.

# 9 SDI Converters

Broadcast Grade Image Quality, Frequency Conversion Supported

## High Quality & 7 × 24h Stable Operation

Support mutual conversion between SDI and SDI/HDMI/VGA/CVBS to meet multi-scene applications. (Conversion between SDI and NDI can be customized)

120X100X26mm

## CV180/CV190/C1 Mini HD SDI Converters

- ✔ Convert between SDI and SDI/HDMI/VGA/CVBS
- ✔ Frame rate conversion, supporting professional processing such as up-down conversion and de-interlacing
- ✔ Support 1 input and 2 output modes

46X96X23mm

**CV180:** Convert SDI to SDI/HDMI/VGA/CVBS, supporting frequency conversion

**CV190:** Convert HDMI/VGA/CVBS to SDI, supporting frequency conversion

**C1 MINI:** Convert SDI to HDMI

### Highlights

- YUV4:2:2 10Bit conversion without color distortion.
- Professional color adjustment, 3D noise reduction, interlace/progressive video conversion, video scaling up/down and framerate conversion etc., which can guarantee the professional image conversion quality.
- Support blue screen warning of signal loss.
- CV180 supports analog audio output independently, CV190 supports analog audio embedded input to SDI signal.

### Converters Parameters

Model No.	CV180	CV190	C1 Mini
Input	3G-SDI	HDMI/VGA/AV(CVBS)	3G-SDI
Output	2-CH of SDI/HDMI/VGA/AV(CVBS)	3G-SDI, Max 2 channels at a time	HDMI
Loop	3G-SDI	/	/
Network	/	/	/
Analog audio input/output	Analog audio output independently	Analog audio embedded to SDI signal	/
Max Resolution	1080 P60	1080 P60	1080 P60
Resolution conversion	Support	Support	/
Operating temperature	-20℃~60℃	-20℃~60℃	-20℃~60℃
Power	12V, 1A	12V, 1A	5~16V
Dimension	120×100×26mm	120×100×26mm	46×96×23mm
